The Client

Sherwood Corporate Solutions are a St. James's Place partner who provide strategic and life-long financial consultancy for business and private clients with complex financial affairs.

The Challenge

As lockdown was put in place in the UK during the CoronaVirus pandemic Sherwood needed to improve their facility for 'remote working' enabling their team to keep the business running.

The Solution

We set up Microsoft Teams for all users, enabling a SharePoint instance so that staff could access documents they required.

The Feedback

Financial Adviser, Stephen Beasley, said "Affinity were quick to set up Teams for all users, set up user groups for us and within a few days all staff were working as normal.

Nothing was too much trouble during what was a very difficult time while the world was struggling but the service provided by Affinity was excellent, having someone on the phone who was willing to help and advise.

When so much of the world stopped talking to their customers, Affinity was the opposite and were working as normal. We are seeing the benefits of all this work now that the office is getting back to normal.

I would particularly like to thank Elliott in Sales and James in Support for all of their efforts."
