

Case Study

Client: MPM

Sector: Manufacturing

Location: Bradford

Project: Temperature
Screening

The Client

MPM (Moulds Patterns and Model Ltd) are UK Manufacturers and Suppliers of Composite/Fibreglass Tooling and Products.

The Challenge

MPM were looking to get their manufacturing and warehouse operation back up and running and to that end, wanted a safe environment to protect staff and customers alike.

The Solution

MPM identified various measures to allow them to return to work and as part of those measures the technology behind the temperature screening solution was key to allowing staff back into their working environment. The decision was made with the health and safety of the staff and visitors at the heart of it.

The Feedback

"Thanks to Affinity for installing our temperature screening equipment this week ensuring we can monitor health even further, keeping the teams and visitors safe during these COVID-19 challenging times."

"Thanks to Affinity for installing our temperature screening equipment."
